

La Illawarra

Notes:

The A and C parts have been taken down an octave for ease of playing. The B has been taken down two for the same reason. If one is able to play only one note at a time, play the top note. That is, in a chord with middle C and the E above it, play the E. However, with octaves, either the higher or the lower may be played, provided one is consistent.

Melody only is available upon request.
